College Learning Strategies teaches the skills and strategies that will enable readers to become life-long learners capable of knowing how to approach new and difficult material in college and beyond. The skills taught in this book will serve readers well in the future in a variety of learning situations. *College Learning Strategies* is designed to engage readers in thought about their own learning and the important role they play in the learning process. Because effective learning is a complex process, the authors have based the book on the idea that there are four key factors that must interact for learning to occur: 1. The characteristics of the learner (motivation, interest, beliefs, etc); 2. The tasks that readers are asked to do (both the level of thinking required and type of assessment); 3. The strategies that readers must use (previewing, annotation, mapping, etc); and 4. The characteristics of the books with which readers interact (textbooks, lecture, internet, and other sources of information). For those interested in developing their study skills.
