*Luciano Alparone, Bruno Aiazzi, Stefano Baronti, Andrea Garzelli*

**Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations)** Luciano Alparone, Bruno Aiazzi, Stefano Baronti, Andrea Garzelli

A synthesis of more than ten years of experience, **Remote Sensing Image Fusion** covers methods specifically designed for remote sensing imagery. The authors supply a comprehensive classification system and rigorous mathematical description of advanced and state-of-the-art methods for pansharpening of multispectral images, fusion of hyperspectral and panchromatic images, and fusion of data from heterogeneous sensors such as optical and synthetic aperture radar (SAR) images and integration of thermal and visible/near-infrared images. They also explore new trends of signal/image processing, such as compressive sensing and sparse signal representations.

The book brings a new perspective to a multidisciplinary research field that is becoming increasingly articulate and comprehensive. It fosters signal/image processing methodologies toward the goal of information extraction, either by humans or by machines, from remotely sensed images. The authors explain how relatively simple processing methods tailored to the specific features of the images may be winning in terms of reliable performance over more complex algorithms based on mathematical theories and models unconstrained from the physical behaviors of the instruments.

Ultimately, the book covers the births and developments of three generations of RS image fusion. Established textbooks are mainly concerned with the earliest generation of methods. This book focuses on second generation methods you can use now and new trends that may become third generation methods. Only the lessons learned with second generation methods will be capable of fostering the excellence among the myriad of methods that are proposed almost every day by the scientific literature.

### **From reader reviews:**

#### **Catherine Nelson:**

Here thing why this Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) are different and trustworthy to be yours. First of all examining a book is good but it depends in the content than it which is the content is as delicious as food or not. Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) giving you information deeper including different ways, you can find any guide out there but there is no e-book that similar with Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations). It gives you thrill reading journey, its open up your current eyes about the thing that happened in the world which is possibly can be happened around you. It is possible to bring everywhere like in area, café, or even in your way home by train. For anyone who is having difficulties in bringing the published book maybe the form of Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) in e-book can be your alternate.

#### **Joey Mendoza:**

Nowadays reading books be a little more than want or need but also be a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of e-book you read, if you want get more knowledge just go with training books but if you want really feel happy read one together with theme for entertaining such as comic or novel. Often the Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) is kind of book which is giving the reader unpredictable experience.

#### **James Sweeney:**

Typically the book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) will bring one to the new experience of reading a new book. The author style to explain the idea is very unique. If you try to find new book to read, this book very suited to you. The book Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) is much recommended to you to learn. You can also get the e-book from your official web site, so you can quicker to read the book.

#### **Michael Velez:**

Reading a book being new life style in this year; every people loves to read a book. When you go through a book you can get a lot of benefit. When you read books, you can improve your knowledge, because book has a lot of information on it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your research, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this sort of us novel, comics, along with soon. The Remote Sensing Image Fusion (Signal and Image Processing of Earth Observations) provide you with new experience in reading a book.
