Energy Storage Flywheels on Spacecraft Robert O. Barlett

With advances in carbon composite material, magnetic bearings, microprocessors, and high-speed power switching devices, work has begun on a space qualifiable Energy Momentum Wheel (EMW). An EMW is a device that can be used on a satellite to store energy, like a chemical battery, and manage angular momentum, like a reaction wheel. These combined functions are achieved by the simultaneous and balanced operation of two or more energy storage flywheels. An energy storage flywheel typically consists of a carbon composite rotor driven by a brushless DC motor/generator. Each rotor has a relatively large angular moment of inertia and is suspended on magnetic bearings to minimize energy loss. The use of flywheel batteries on spacecraft will increase system efficiencies (mass and power), while reducing design-production time and life-cycle cost. This paper will present a discussion of flywheel battery design considerations and a simulation of spacecraft system performance utilizing four flywheel batteries to combine energy storage and momentum management for a typical LEO satellite. A proposed set of control laws and an engineering animation will also be presented. Once flight qualified and demonstrated, space flywheel batteries may alter the architecture of most medium and high-powered spacecraft.

From reader reviews:

Geraldine Matson:

Information is provisions for folks to get better life, information nowadays can get by anyone from everywhere. The information can be a information or any news even a huge concern. What people must be consider whenever those information which is in the former life are hard to be find than now is taking seriously which one would work to believe or which one the actual resource are convinced. If you have the unstable resource then you understand it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take Energy Storage Flywheels on Spacecraft as the daily resource information.

Staci Eager:

Playing with family in the park, coming to see the water world or hanging out with close friends is thing that usually you could have done when you have spare time, in that case why you don't try point that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Energy Storage Flywheels on Spacecraft, you can enjoy both. It is fine combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout men. What? Still don't buy it, oh come on its known as reading friends.

Helen Massey:

Is it you actually who having spare time after that spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Energy Storage Flywheels on Spacecraft can be the answer, oh how comes? A book you know. You are thus out of date, spending your free time by reading in this fresh era is common not a nerd activity. So what these guides have than the others?

Dona Cole:

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. So you know that little person similar to reading or as looking at become their hobby. You must know that reading is very important and book as to be the matter. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you take to be your object. One of them is this Energy Storage Flywheels on Spacecraft.
