Advanced Aseptic Processing Technology (Drugs and the Pharmaceutical Sciences)

Advanced Aseptic Processing Technology (Drugs and the Pharmaceutical Sciences)

The preparation of sterile products using aseptic processing is considered perhaps the most critical process in the pharmaceutical industry and has witnessed continual improvement over the last half century. New approaches that have transformed classical aseptic production methods are appearing almost daily. This book reviews emerging technologies for aseptic processing that will markedly reduce the level of contamination risk for sterile products and includes coverage on:

- The use of isolator and barrier concepts for aseptic processing and assembly.
- The application of robotics as an alternative to gowned personnel.
- The increasing reliance on automation to minimize or eliminate operator intervention.
- The design, operational, monitoring and compliance changes necessary for success with advanced aseptic processing.

Advanced Aseptic Processing Technology is an essential reference for anyone working with sterile products, and is recommended for individuals in manufacturing, compliance, regulatory affairs, microbiology, environmental monitoring, sterility testing, sterilization, validation, engineering, development, facility and equipment design, component and equipment suppliers, automation, and robotics.
