UNIFIED FACILITIES CRITERIA (UFC) LANDSCAPE ARCHITECTURE

U.S. Department Of Defense

UNIFIED FACILITIES CRITERIA (UFC) LANDSCAPE ARCHITECTURE U.S. Department Of Defense

1-1 PURPOSE AND SCOPE

The purpose of this UFC is to provide technical requirements and design guidance in the discipline field of landscape architecture associated with site improvements and site design for Department of Defense (DoD) projects.

1-2 APPLICABILITY

The purpose of this UFC is to provide technical requirements and design guidance in the discipline field of landscape architecture associated with site improvements and site design for Department of Defense (DoD) projects.

This UFC is applicable to all DoD projects with site improvements regardless of the method of execution or the funding source. This includes sustainment, restoration and modernization as well as new construction. The term site improvements refers to all site modification that will result in permanent, on or above-ground, paving, features, or landforms. Representative types of site modification are indicated in the section on Pre-Design and Design Services. The term site improvements does not refer to either: enclosed buildings, in themselves; or, airfield pavements. For a more comprehensive presentation of potential site improvement issues and treatments see Appendix B Best Practices in Landscape Architecture.

1-3 GENERAL REQUIREMENTS

Design of all site improvement features shall be accomplished by an experienced registered professional. As a minimum, all construction projects with site improvement costs over \$250,000 shall have a landscaping plan and supporting details signed by a registered professional in the state of the project location. For states without licensure requirements, the designer shall be licensed in an adjacent state or jurisdiction. This requirement is consistent with that of the Federal Acquisition Regulations (FAR) and the majority of state departments of professional regulation, which require signature by a licensed professional in their field of study and expertise. In most cases this will be a registered Landscape Architect. More stringent professional requirements and certifications may be required in the individual design and construction contracts.

1-3.1 Experience

The designer shall have a minimum of three years experience in the design and management of projects similar in scope and complexity to the current project. In addition, the designer shall have experience in sustainable development and low impact design as it relates to site improvements and features.

1-3.2 Design Services

The designer shall facilitate the integration of the current project with the existing context, focusing on such specifics as safety, security, sustainability,
