Complex and Adaptive Dynamical Systems: A Primer

Claudius Gros

Complex and Adaptive Dynamical Systems: A Primer Claudius Gros

This primer offers readers an introduction to the central concepts that form our modern understanding of complex and emergent behavior, together with detailed coverage of accompanying mathematical methods. All calculations are presented step by step and are easy to follow.

This new fourth edition has been fully reorganized and includes new chapters, figures and exercises. The core aspects of modern complex system sciences are presented in the first chapters, covering network theory, dynamical systems, bifurcation and catastrophe theory, chaos and adaptive processes, together with the principle of self-organization in reaction-diffusion systems and social animals. Modern information theoretical principles are treated in further chapters, together with the concept of self-organized criticality, gene regulation networks, hypercycles and coevolutionary avalanches, synchronization phenomena, absorbing phase transitions and the cognitive system approach to the brain.

Technical course prerequisites are the standard mathematical tools for an advanced undergraduate course in the natural sciences or engineering. Each chapter includes exercises and suggestions for further reading, and the solutions to all exercises are provided in the last chapter.

From the reviews of previous editions:

This is a very interesting introductory book written for a broad audience of graduate students in natural sciences and engineering. It can be equally well used both for teaching and self-education.

Very well structured and every topic is illustrated with simple and motivating examples. This is a true guidebook to the world of complex nonlinear phenomena. (Ilya Pavlyukevich, Zentralblatt MATH, Vol. 1146, 2008)

Claudius Gros' *Complex and Adaptive Dynamical Systems: A Primer* is a welcome addition to the literature. A particular strength of the book is its emphasis on analytical techniques for studying complex systems. (David P. Feldman, *Physics Today*, July, 2009).

From reader reviews:

Patricia Smith:

Do you have favorite book? If you have, what is your favorite's book? Guide is very important thing for us to know everything in the world. Each e-book has different aim or even goal; it means that e-book has different type. Some people feel enjoy to spend their a chance to read a book. They can be reading whatever they get because their hobby is definitely reading a book. Consider the person who don't like looking at a book? Sometime, person feel need book once they found difficult problem or maybe exercise. Well, probably you should have this Complex and Adaptive Dynamical Systems: A Primer.

Donald Campbell:

The book untitled Complex and Adaptive Dynamical Systems: A Primer contain a lot of information on the idea. The writer explains the girl idea with easy means. The language is very easy to understand all the people, so do not really worry, you can easy to read this. The book was compiled by famous author. The author will bring you in the new period of literary works. It is possible to read this book because you can continue reading your smart phone, or model, so you can read the book in anywhere and anytime. In a situation you wish to purchase the e-book, you can available their official web-site in addition to order it. Have a nice study.

Harry Oliver:

You can spend your free time to see this book this publication. This Complex and Adaptive Dynamical Systems: A Primer is simple bringing you can read it in the area, in the beach, train in addition to soon. If you did not get much space to bring the actual printed book, you can buy the actual e-book. It is make you easier to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

Linda Bryant:

As a college student exactly feel bored to reading. If their teacher requested them to go to the library or to make summary for some reserve, they are complained. Just small students that has reading's spirit or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Complex and Adaptive Dynamical Systems: A Primer can make you experience more interested to read.
