# The Youngest Science: Notes of a Medicine-Watcher (Alfred P. Sloan Foundation Series)

*Lewis Thomas*

**The Youngest Science: Notes of a Medicine-Watcher (Alfred P. Sloan Foundation Series)** Lewis Thomas

From the 1920s when he watched his father, a general practitioner who made housecalls and wrote his prescriptions in Latin, to his days in medical school and beyond, Lewis Thomas saw medicine evolve from an art into a sophisticated science. *The Youngest Science* is Dr. Thomas's account of his life in the medical profession and an inquiry into what medicine is all about--the youngest science, but one rich in possibility and promise.

He chronicles his training in Boston and New York, his war career in the South Pacific, his most impassioned research projects, his work as an administrator in hospitals and medical schools, and even his experiences as a patient. Along the way, Thomas explores the complex relationships between research and practice, between words and meanings, between human error and human accomplishment, More than a magnificent autobiography, *The Youngest Science* is also a celebration and a warning--about the nature of medicine and about the future life of our planet.
