Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series)

Sirshendu De, Sourav Mondal

Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series) Sirshendu De, Sourav Mondal

A response to increasingly stringent regulation of pollution and toxicity levels in industrial waste discharge, **Micellar Enhanced Ultrafiltration: Fundamentals & Applications** offers the most complete book available on the benefits and use of micellar-enhanced ultrafiltration (MEUF) to achieve continuous removal of organic and inorganic pollutants.

An Unparalleled Book That Addresses Both Academic and Industrial Points of View

Several membrane-based techniques, such as microfiltration, ultrafiltration, nanofiltration, and reverse osmosis, are currently used in a wide range of applications throughout the textile, pulp and paper, sugar, chemical, pharmaceutical, biomedical, biotechnological, and food industries. However, although reverse osmosis is an effective means of removing contaminants, this book explains why MEUF is a better substitute, as it is less expensive, less energy-intensive, and more efficient and practical for a wider range of applications.

Topics covered include:

- Effects of pollution in water and its consequences
- Various treatment processes and membrane technologies
- Fundamentals of ultrafiltration
- Outline of various membrane modules and modeling approaches
- Principles of colloid chemistry
- Theories of micelle formation
- Stability and dynamics of micelles
- Phenomena of counterion binding
- Solubilization of organic pollutants
- Selection criteria for surfactants
- Various flux enhancement techniques
- Recovery of precious metals

This book conveys how, with proper selection of surfactant and membrane, MEUF can be used to efficiently remove almost all metal ions (heavy metals, lanthanides, radioactive materials, etc.) with reasonably high efficiency and throughput. It also details the MEUF process for removal of inorganic (cations, anions, and their mixture) and organic pollutants. The authors explain how the economy of the overall process makes recovery and reuse of surfactants essential, and they address various influencing factors on the increase in throughput and the resulting operating problems. Elaborating on technologies involving precipitation and other methods, they also illustrate additional potential applications for MEUF technology.

From reader reviews:

Heather Snyder:

This book untitled Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series) to be one of several books that best seller in this year, that is because when you read this e-book you can get a lot of benefit in it. You will easily to buy this book in the book retail outlet or you can order it by using online. The publisher with this book sells the e-book too. It makes you more readily to read this book, as you can read this book in your Mobile phone. So there is no reason to you to past this publication from your list.

Anna Brooks:

The book Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series) will bring someone to the new experience of reading a book. The author style to explain the idea is very unique. In case you try to find new book you just read, this book very appropriate to you. The book Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series) is much recommended to you you just read. You can also get the e-book from official web site, so you can more readily to read the book.

Joyce Volz:

The particular book Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series) has a lot details on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research prior to write this book. This book very easy to read you can find the point easily after reading this book.

Brian Smith:

What is your hobby? Have you heard that will question when you got scholars? We believe that that concern was given by teacher to their students. Many kinds of hobby, All people has different hobby. And also you know that little person like reading or as studying become their hobby. You must know that reading is very important in addition to book as to be the issue. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You discover good news or update with regards to something by book. Different categories of books that can you choose to adopt be your object. One of them is Micellar Enhanced Ultrafiltration: Fundamentals & Applications (IIT Kharagpur Research Monograph Series).
