Brendan T. Finucane

Principles of Airway Management, 4th Edition, reviews the essential aspects of airway management: anatomy, equipment, intubation, fiberoptic endoscopy, surgical approaches, intubating LMA (lightwand), pediatric airway, CPR, and mechanical ventilation. The book features well-balanced discussions of the complexities and difficult issues associated with airway management; excellent organization that ensures the material can be learned and applied to various situations; the latest equipment and techniques; summary boxes which highlight the most important points of each chapter; and more than 400 illustrations (many in color, for the first time), tables, and boxes.
