Seam in Action Dan Allen

JBoss Seam is an exciting new application framework based on the Java EE platform that is used to build rich, web-based business applications. Seam is rapidly capturing the interest of Java enterprise developers because of its focus on simplicity, ease of use, transparent integration, and scalability.

Seam in Action offers a practical and in-depth look at JBoss Seam. The book puts Seam head-to-head with the complexities in the Java EE architecture. The author presents an unbiased view of Seam from outside the walls of RedHat/JBoss, focusing on such topics as Spring integration and deployment to alternative application servers to steer clear of vendor lock-in. By the end of the book, you should expect to not only gain a deep understanding of Seam, but also come away with the confidence to teach the material to others.

To start off, you will see a working Java EE-compliant application come together by the end of the second chapter. As you progress through the book, you will discover how Seam eliminates unnecessary layers and configurations, solves the most common JSF pain points, and establishes the missing link between JSF, EJB 3 and JavaBean components. The author also shows you how Seam opens doors for you to incorporate technologies you previously have not had time to learn, such as business processes and stateful page flows (jBPM), Ajax remoting, PDF generation, asynchronous tasks, and more.

All too often, developers spend a majority of their time integrating disparate technologies, manually tracking state, struggling to understand JSF, wrestling with Hibernate exceptions, and constantly redeploying applications, rather than on the logic pertaining to the business at hand. *Seam in Action* dives deep into thorough explanations of how Seam eliminates these non-core tasks by leveraging configuration by exception, Java 5 annotations, and aspect-oriented programming.

Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

From reader reviews:

Lewis Wood:

The publication untitled Seam in Action is the reserve that recommended to you to read. You can see the quality of the publication content that will be shown to you actually. The language that author use to explained their way of doing something is easily to understand. The author was did a lot of study when write the book, so the information that they share to you personally is absolutely accurate. You also will get the e-book of Seam in Action from the publisher to make you more enjoy free time.

Harold McDonough:

People live in this new morning of lifestyle always try to and must have the spare time or they will get wide range of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely without a doubt. People is human not only a robot. Then we inquire again, what kind of activity do you have when the spare time coming to an individual of course your answer will unlimited right. Then do you ever try this one, reading publications. It can be your alternative throughout spending your spare time, often the book you have read will be Seam in Action.

Anthony Callahan:

Playing with family within a park, coming to see the coastal world or hanging out with pals is thing that usually you will have done when you have spare time, subsequently why you don't try factor that really opposite from that. Just one activity that make you not sensation tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Seam in Action, you can enjoy both. It is good combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't buy it, oh come on its referred to as reading friends.

Nicolas Olsen:

As a scholar exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some publication, they are complained. Just minor students that has reading's heart or real their pastime. They just do what the professor want, like asked to the library. They go to right now there but nothing reading very seriously. Any students feel that reading through is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Seam in Action can make you feel more interested to read.
