Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology)

R. Paul Singh

Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology) R. Paul Singh

The Institute of Food Technologists (IFT) recently endorsed the use of computers in food science education. The minimum standards for degrees in food science, as suggested by IFT, "require the students to use computers in the solution of problems, the collection and analysis of data, the control processes, in addition to word processing." Because they are widely used in business, allow statistical and graphical of experimental data, and can mimic laboratory experimentation, spreadsheets provide an ideal tool for learning the important features of computers and programming. In addition, they are ideally suited for food science students, who usually do not have an extensive mathematical background.

Drawing from the many courses he has taught at UC Davis, Dr. Singh covers the general basics of spreadsheets using examples specific to food science. He includes more than 50 solved problems drawn from key areas of food science, namely food microbiology, food chemistry, sensory evaluation, statistical quality control, and food engineering. Each problem is presented with the required equations and detailed steps necessary for programming the spreadsheet. Helpful hints in using the spreadsheets are also provided throughout the text.

Key Features

- * The first book to integrate spreadsheets in teaching food science and technology
- * Includes more than 50 solved examples of spreadsheet use in food science and engineering
- * Presents a step-by-step introduction to spreadsheet use
- * Provides a food composition database on a computer disk

From reader reviews:

Kevin Applegate:

In this 21st century, people become competitive in most way. By being competitive today, people have do something to make all of them survives, being in the middle of the particular crowded place and notice simply by surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yes, by reading a book your ability to survive enhance then having chance to remain than other is high. To suit your needs who want to start reading a new book, we give you this specific Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology) book as starter and daily reading reserve. Why, because this book is usually more than just a book.

Duane Harden:

People live in this new morning of lifestyle always make an effort to and must have the spare time or they will get large amount of stress from both way of life and work. So , once we ask do people have spare time, we will say absolutely indeed. People is human not a robot. Then we inquire again, what kind of activity have you got when the spare time coming to you actually of course your answer may unlimited right. Then do you ever try this one, reading publications. It can be your alternative inside spending your spare time, the particular book you have read is actually Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology).

Ronald Johnson:

Many people spending their period by playing outside with friends, fun activity with family or just watching TV the entire day. You can have new activity to enjoy your whole day by studying a book. Ugh, you think reading a book can actually hard because you have to take the book everywhere? It all right you can have the e-book, taking everywhere you want in your Smart phone. Like Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology) which is getting the e-book version. So , try out this book? Let's find.

Lillian Burbank:

Is it a person who having spare time after that spend it whole day through watching television programs or just lying on the bed? Do you need something totally new? This Computer Applications in Food Technology: Use of Spreadsheets in Graphical, Statistical, And Process Analysis (Food Science and Technology) can be the respond to, oh how comes? A fresh book you know. You are therefore out of date, spending your extra time by reading in this new era is common not a geek activity. So what these publications have than the others?
