Peters Equal Area World Map 39.5"x 50" laminated & gift-tubed [July, 2014] by Arno Peters; Includes explanation by ODTmaps and Oxford Cartographers Arno Peters

This is the gift-tubed version of the Peters Projection World Map, an equal area projection. That means that one square inch anywhere on the map is an equal number of square miles. All the countries of the world are represented at true size and true proportion. This is one of the few commercially available maps that is fair to all peoples. Most maps drastically enlarge the size of the Northern hemisphere countries and diminish the size of the Southern hemisphere countries. This traditional bias leads most people to overestimate the importance of the developed nations based on their inflated appearance. The updated 2014 Peters Projection Equal Area map comes laminated (3 mil, edge seal) and is gift-tubed - rolled in a durable plastic screw-tube for easy and safe storage. If you never intend to store the map, then save a few \$ and buy the cheaper version which comes in an ugly brown cardboard tube. An explanation is enclosed with the map including comparisons to other common projections (Mercator, Van der Grinten, Robinson, Tripel-Winkel, etc.). This new version is 39" x 50" and is 30% larger than previous version of the Peters wall map. It includes the cartographic updates as of June 2014 (previous smaller version with extra side panel was published in 2008).
